Peltarion

A Rising star

“Every positive leap for mankind has been fuelled by intelligence”

Meet the Stockholm founded company Peltarion on an inspiring lecture on the future of AI in Sweden; and its effect on companies and society as a whole. AI is the most transformative technology of this century and has already begun to show how drastically it will improve our lives.

Peltarion created a platform that offers a graphical interface which helps to easily model and deploy AI in a simple and easy way, empowering developers to solve real-life problems with AI. The Peltarion team's, filled with engineers from Spotify, Google, Skype etc, has been used by over 300 companies such as NASA, Tesla, iZettle and BMW.
